**Subject:** Dimock test results

Hello Terri,

I have a few questions after examining the well test data from Dimock that I hope you can help me with...

1. I presume testing included all affected homes on Carter Road? Is this true?
2. How was list of substances selected? I presume appropriate tests were performed for all substances listed in the test results. Is this right?
3. Do filtered samples reflect the treatment systems currently in place? Can you tell me how many wells are now filtered and which ones?
4. Similarly, how many wells have methane mitigation? Which ones? (20?)
5. Is there information (map) on the distribution of sampled water wells relative to gas wells?
6. Why is the trigger for Barium higher than the Primary MCL?
7. Glycol -does the caveat on this analysis mean that it wasn't really examined?

Thank you. -- Ex. 6 - Personal Privacy
